BK GENERAL INSURANCE COMPANY LIMITED STATEMENT OF DIRECTORS' RESPONSIBILITIES For the year ended 31 December 2020

Law No. 17/2019 of 13/04/2018 governing companies requires the directors to prepare financial statements for each accounting period which give a true and fair view of the state of affairs of the Company as at the end of the financial period and of the Company's profit or loss. It also requires the directors to ensure that the Company maintains proper accounting records that disclose, with reasonable accuracy, the financial position of the Company. The directors are also responsible for safeguarding the assets of the Company.

The directors accept responsibility for the presentation and preparation of financial statements of the Company in accordance with International Financial Reporting Standards and in the manner required by Law No. 17/2018 of 13/04/2018 governing companies. They also accept responsibility for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The directors are also responsible in preparing the financial statements, for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters relating to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The audit of the financial statements does not relieve the directors of this responsibility.

The directors are of the opinion that the financial statements give a true and fair view of the financial position of the Company as at 31 December 2020, the Company's financial performance and cash flows for the period then ended in accordance with International Financial Reporting Standards and the requirements of Law No. 17/2018 of 13/04/2018 governing companies.

Approval of annual financial statements

The financial statements on pages 12 to 60 were approved by the Board of directors and are signed on its behalf by:

PWC PwC Rwanda Limited

BK General Insurance Company Limited is owned by BK Group PLC and SWAN General Limited with 70% and 30% stakes respectively.

BK General Insurance Company Limited ("BK GI") is committed to adhering to the highest standards of good corporate governance at all levels of its operations. This commitment is rooted in our core values and beliefs. We have put in place elaborate governance processes, which comply with best practice as set out in various codes on Corporate Governance.

Board of Directors & their meetings attendance

The Board consists of four independent non-executive directors. The Board is composed of directors with a good mix of skills, experience, and competencies in the relevant fields of expertise and is well placed to take the business forward. Appointments to the Board are made after careful consideration.

During the year, the Board convened and held four (4) ordinary meetings. All the meetings convened had sufficient quorum. A review of attendance to meetings by individual members during the period under review indicates that all the members gave sufficient time and attention to the affairs of the Board. The Directors in office and their attendance to main Board are as follows:

Names	Position	Meetings eligible to attend	Meetings attended
Sandra Rwamushaija	Chairperson	4	4
Dr. Jack N. Kayonga	Vice chairperson	4	4
Nathalie Mpaka	Director	4	4
Yves Gatsimbanyi	Director	4	4
Jean Enock Habiyambere	Director	2	2
Shehzad Noordally	Director	4	4
Patrice Bastide M.G.M	Director	4	3
Ephrem Turahirwa	Director (Retired)	1	1

Board Charter and Work Plan

The Board Charter contains provisions that ensure that the Board observes best practice in corporate governance and contains among other things; the size, role and functions of the Board; appointments, induction and tenure of directors and Board performance evaluation and remuneration of directors. The Work Plan has a formal schedule of matters specifically reserved for the Board's attention to ensure it exercises full control over all significant matters. It sets out the schedule of meetings of the Board and its committees and the main business to be dealt with at those meetings. Additional meetings are scheduled as and when the need arises.

Board Meetings

The Board of Directors meet quarterly or as required in order to monitor the implementation of the Company's planned strategy, review it in conjunction with its financial performance and approves issues of strategic nature. Specific reviews are also undertaken on operational issues and future planning.

Board Committees

The Board has created the following principal committees, which normally meet on quarterly basis under well-defined and materially delegated terms of reference set by the Board.

BK GENERAL INSURANCE COMPANY LIMITED STATEMENT OF CORPORATE GOVERNANCE For the year ended 31 December 2020

a. Audit Committee

The Audit Committee in principal meets quarterly or as required. In accordance with regulatory requirement, the committee comprise non- executive members of the Board who are independent of the day today management of the company's operations with only one Non-Independent Director. The committee deals with all matters relating to the financial statements and internal control systems of the Company including dealing with independent auditors and National Bank of Rwanda inspectors.

b. Risk Management Committee

The committee was set up to assist the Board to mitigate risks in the Insurance business. It meets quarterly to advise the business on all matters pertaining to risk management in the market, operations and other risks.

c. Investments, Assets, Liability and HR Committee

The committee meets quarterly where applicable to review Company's investments, Assets and liabilities in addition to that, it reviews human resource policies and make suitable recommendations to the Board on senior management appointments and other related personnel. This committee advises the Board as well on remuneration related to employees.

d. Underwriting and Claims Strategy Committee

This Committee was set to assist Board to understand the framework of the Insurance Business – Underwriting, Reinsurance and Claims. It reviews all reports related claims in line with corporate governance regulation and assess the adequacy of insurance reserves. It also advises the Board on the reinsurance treaties, related capacity and retention.

Separation of Role of Chairman from Managing Director

The Chairman is responsible for managing the Board and providing leadership to the Company while the Managing Director is responsible to the Board for running the business in accordance with the delegation of powers given by the Board. The Managing Director directs the implementation of Board decisions and instructions and the general management of the business with the assistance of the Senior Management Team.

Report on the audit of the financial statements

Our opinion

In our opinion, BK General Insurance Company Limited (the "Company") financial statements give a true and fair view of the financial position of BK General Insurance Company Limited (the "Company") (the "Company") as at 31 December 2020, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of Law No.17/2018 of 13/04/2018 Governing Companies.

What we have audited

The Company's financial statements as set out on pages 12 - 60 comprise:

- the statement of financial position as at 31 December 2020;
- the statements of comprehensive income;
- · the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the financial statements section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with IESBA International Code of Ethics for Professional Accountants (including International Independence Standards). We have fulfilled our other ethical responsibilities in accordance with the IESBA Code.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the Company financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter

How our audit addressed the key audit matter

Determination of insurance contract liabilities

Insurance contract liabilities included in note 21 of the financial statements are made up of reported claims and incurred but not reported ("IBNR") claims. These were considered a matter of most significance to the current year audit for the following reasons:

- The estimation of the provisions involves significant judgement given the inherent uncertainty in estimating expected future outflows in relation to claims incurred.
- The valuation of these liabilities relies on the accuracy of claims data and the assumption that future claims development will follow a similar pattern to past claims development experience.
- The magnitude of the insurance contract liabilities balance (FRW 8,344,577,000) in relation to total liabilities of (FRW 14,305,052).

Any change to these assumptions and methodology can result in a material impact to the valuation of insurance contract liabilities.

Our testing approach included amongst others, the following procedures with the assistance of our actuarial specialists:

- Evaluating and testing the controls around the claim reserving and settlement process;
- Evaluating managements' process for reviewing the adequacy of the provisions;
- Checked the accuracy of the data used by the statutory actuary by tracing the policyholder valuation input data, such as premiums, claims and expense data used in the valuation model to information contained in the administration and accounting systems.
- Comparing, for a sample of claims, the amounts as recorded in the claims systems to source documents:
- Performed a review of the methodology and assumptions used to compute the liabilities against generally accepted actuarial practice approaches, in relation to the business written and expected risks; and
- Tested the robustness of the reserving process by performing an actual vs expected analysis on prior years' reserves to assess this for any surpluses or shortfalls.

Other information

Directors are responsible for the other information. The other information comprises the Directors' report, Statement of directors' responsibilities, statement of corporate governance and supplementary information but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the financial statements

Directors are responsible for the preparation of the financial statements that give a true and fair view in accordance with International Financial Reporting Standards and the requirements of Law No.17/2018 of 13/04/2018 Governing Companies, and for such internal control as directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

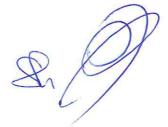

Directors are also responsible for overseeing the Company's financial reporting process.

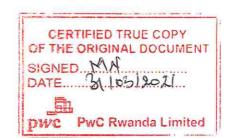

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not
 detecting a material misstatement resulting from fraud is higher than for one resulting from error,
 as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override
 of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances, but not for the purpose of expressing an
 opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

Auditor's responsibilities for the audit of the financial statements (continued)

- Conclude on the appropriateness of director's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on other legal and regulatory requirements

Article 132 of Law No.17/2018 of 13/04/2018 Governing Companies requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

- i. We have no relationship, interest or debt with BK General Insurance Company Limited. As indicated in our report on the financial statements, we have complied with the required ethical requirements. These are the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) which includes comprehensive independence and other requirements;
- ii. We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
- iii. In our opinion, proper books of account have been kept by the Company, so far as appears from our examination of those books; and
- iv. We have communicated to the Company's Board of Directors, through a separate management letter, internal control matters identified in the course of our audit including our recommendations in relation to those matters.
- v. According to the best of the information and the explanations given to us as auditors, as shown by the accounting and other documents of the company, the annual accounts comply with Article 123 of Law No.17/2018 of 13/04/2018 Governing Companies.

For PricewaterhouseCoopers Rwanda Limited, Kigali,

Moses Nyapane Director March 202

1. General information

BK General Insurance Company Limited underwrites short-term insurance business (non-life) risks. The company is a limited liability company incorporated and domiciled in Rwanda. The registered office is:

BK General Insurance Company Limited 4th Floor, BK Annex Building P.O. Box 724 Kigali, Rwanda

2. Summary of significant accounting policies

This note provides a list of the significant accounting policies adopted in the preparation of these financial statements to the extent they have not already been disclosed in the other notes above. These policies have been consistently applied to all the years presented, unless otherwise stated.

a) Basis of preparation

(i) Compliance with IFRS

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) and interpretations issued by the IFRS Interpretations Committee (IFRS IC) applicable to companies reporting under IFRS. The financial statements comply with IFRS as issued by the International Accounting Standards Board (IASB).

(ii) Historical cost convention

The financial statements have been prepared on a historical cost basis, except for the certain financial assets carried at fair value through other comprehensive income.

(iii) New and amended standards adopted by the Company

The Company has applied the following standards and amendments for the first time for their annual reporting period commencing 1 January 2020:

- Definition of Material amendments to IAS 1 and IAS 8
- Definition of a Business amendments to IFRS 3
- Interest Rate Benchmark Reform amendments to IFRS 9, IAS 39 and IFRS 7
- Revised Conceptual Framework for Financial Reporting

The Company also elected to adopt the following amendments early: 8

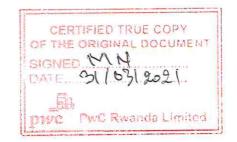

Annual Improvements to IFRS Standards 2018-2020 Cycle.

The amendments listed above did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

(iv) New standards and interpretations not yet adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 31 December 2020 reporting periods and have not been early adopted by the group. The most significant is IFRS 17 *Insurance Contracts*. The directors are currently assessing the impact of the standard on the financial statements.

2. Summary of significant accounting policies (continued)

a) Basis of preparation (continued)

(iv) New standards and interpretations not yet adopted (continued)

IFRS 17, 'Insurance contracts' is applicable for annual periods beginning on or after 1 January 2023. Early application is permitted for entities that apply IFRS 9, 'Financial Instruments', and IFRS 15, 'Revenue from Contracts with Customers', at or before the date of initial application of IFRS 17 (published May 2017).

The IASB issued IFRS 17, 'Insurance contracts', and thereby started a new epoch of accounting for insurers. Whereas the current standard, IFRS 4, allows insurers to use their local GAAP, IFRS 17 defines clear and consistent rules that will significantly increase the comparability of financial statements. For insurers, the transition to IFRS 17 will have an impact on financial statements and on key performance indicators.

Under IFRS 17, the general model requires entities to measure an insurance contract at initial recognition at the total of the fulfilment cash flows (comprising the estimated future cash flows, an adjustment to reflect the time value of money and an explicit risk adjustment for non-financial risk) and the contractual service margin. The fulfilment cash flows are remeasured on a current basis each reporting period. The unearned profit (contractual service margin) is recognised over the coverage period.

Aside from this general model, the standard provides, as a simplification, the premium allocation approach. This simplified approach is applicable for certain types of contract, including those with a coverage period of one year or less.

For insurance contracts with direct participation features, the variable fee approach applies. The variable fee approach is a variation on the general model. When applying the variable fee approach, the entity's share of the fair value changes of the underlying items is included in the contractual service margin. As a consequence, the fair value changes are not recognised in profit or loss in the period in which they occur but over the remaining life of the contract.

Other standards are not expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

2. Summary of significant accounting policies (continued)

b) Insurance contracts

i) Classification

The Company issues contracts that transfer insurance risk. Insurance contracts are those contracts that transfer significant insurance risk. As a general guideline, the company defines as significant insurance risk, the possibility of having to pay benefits on the occurrence of an insured event that are at 10% more than the benefits payable if the insured event did not occur.

Insurance contracts issued by the Company are classified as general insurance business based on the duration of the risk insured. Classes of general insurance include Aviation insurance, Engineering insurance, Fire insurance -domestic risks, Fire insurance - industrial and commercial risks, Liability insurance, Marine Insurance, Motor insurance - private vehicles, Motor insurance - commercial vehicles, Personal accident insurance, Theft insurance, Workmen's Compensation and Employer's Liability insurance and Miscellaneous insurance (i.e. class of business not included under those listed above).

Motor insurance business means the business of affecting and carrying out contracts of insurance against loss of, or damage to, or arising out of or in connection with the use of, motor vehicles, inclusive of third party risks but exclusive of transit risks.

Short term business is normally of single-year duration.

ii) Recognition and measurement

1. Premium income

Premium income is recognized on assumption of risks and includes estimates of premiums due but not yet received less unearned premium. Unearned premiums represent the proportion of the premiums written in periods up to the accounting date that relates to the unexpired terms of policies in force at the financial reporting date and is computed using the 365ths method. Premiums are shown before deduction of commission and are gross of any taxes or duties levied on premiums.

2. Claims and policyholder benefits payable

Claims incurred comprise claims paid in the year and changes in the provision for outstanding claims. Claims paid represent all payments made during the year, whether arising from events during that or earlier years. Outstanding claims represent the estimated ultimate cost of settling all claims arising from incidents occurring prior to the financial reporting date, but not settled at that date. Outstanding claims are computed on the basis of the best information available at the time the records for the year are closed and include provisions for claims incurred but not reported ("IBNR"). Outstanding claims are not discounted.

There is also additional unexpired risk reserve which is a prospective assessment of the amount that needs to be set aside in order to provide for the claims and expenses which will emerge from unexpired risks and which is over and above the unearned premium reserve pertaining to the same risks as the same valuation date.

- 2. Summary of significant accounting policies (continued)
- b) Insurance contracts (continued)
- ii) Recognition and measurement (continued)
- 3. Commissions payable and deferred acquisition costs ("DAC")

A proportion of commission's payable is deferred and amortized over the period in which the related premium is earned. Deferred acquisition costs represent a proportion of acquisition costs that relate to policies that are in force at the year end.

4. Liability adequacy test

At each financial reporting date, liability adequacy tests are performed to ensure the adequacy of the insurance contract liabilities net of related DAC. In performing these tests, current best estimates of future contractual cash flows and claims handling and administration expenses, as well as investment income from the assets backing such liabilities, are used. Any deficiency is immediately charged to profit or loss.

5. Reinsurance contracts

Contracts entered into by the company with reinsurers under which the company is compensated for losses on one or more contracts issued by the company and that meet the classification requirements for insurance contracts are classified as reinsurance contracts held. Contracts that do not meet these classification requirements are classified as financial assets. Insurance contracts entered into by the company under which the contract holder is another insurer (inwards reinsurance) are included with insurance contracts.

The benefits to which the company is entitled under its reinsurance contracts held are recognized as reinsurance assets. These assets consist of short-term balances due from reinsurers, as well as longer term receivables that are dependent on the expected claims and benefits arising under the related reinsured insurance contracts. Amounts recoverable from or due to reinsurers are measured consistently with the amounts associated with the reinsured insurance contracts and in accordance with the terms of each reinsurance contract. Reinsurance liabilities are primarily premiums payable for reinsurance contracts and are recognized as an expense when due.

The company assesses its reinsurance assets for impairment on a quarterly basis. If there is objective evidence that the reinsurance asset is impaired, the company reduces the carrying amount of the reinsurance asset to its recoverable amount and recognizes that impairment loss in the income statement. The company gathers the objective evidence that a reinsurance asset is impaired using the same process adopted for financial assets held at amortized cost. The impairment loss is also calculated following the same method used for these financial assets. These processes are set out in Note 4.

CERTIFIED TRUE COPY

SIGNED AN N
DATE BY PWC Rwanda Limited

2. Summary of significant accounting policies (continued)

- b) Insurance contracts (continued)
- ii) Recognition and measurement (continued)

6. Receivables and payables related to insurance contracts

Receivables and payables are recognized when due. These include amounts due to and from agents, brokers and insurance contract holders. If there is objective evidence that the insurance receivable is impaired, the company reduces the carrying amount of the insurance receivable accordingly and recognizes that impairment loss in the income statement. The company gathers the objective evidence that an insurance receivable is impaired using the same process adopted for loans and receivables. The impairment loss is also calculated under the same method used for these financial assets.

7. Salvage and subrogation reimbursements

Some insurance contracts permit the company to sell (usually damaged) property acquired in settling a claim (for example, salvage). The company may also have the right to pursue third parties for payment of some or all costs (for example, subrogation).

Estimates of salvage recoveries are included as an allowance in the measurement of the insurance liability for claims, and salvage property is recognized in other assets when the liability is settled. The allowance is the amount that can reasonably be recovered from the disposal of the property.

Subrogation reimbursements are also considered as an allowance in the measurement of the insurance liability for claims and are recognized in other assets when the liability is settled. The allowance is the assessment of the amount that can be recovered from the action against the liable third party.

(c) Insurance premium revenue

The revenue recognition policy relating to insurance contracts is set out under note 2(b) above.

(d) Commissions

Commissions receivable are recognized as income in the period in which they are earned.

(e) Interest income

Interest income for all interest-bearing financial instruments, including financial instruments measured at fair value through profit or loss, is recognized within 'investment income' in the Statement of comprehensive income using the effective interest rate method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income.

2. Summary of significant accounting policies (continued)

f) Financial assets

i) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value through OCI; and
- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income (FVOCI).

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

ii) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership

iii) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

2. Summary of significant accounting policies (continued)

f) Financial assets (continued)

Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. There are two measurement categories into which the Company classifies its debt instruments:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented within operating and other expenses the statement of profit or loss.
- FVOCI: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at FVOCI. Movements in the carrying amount are taken through OCI, except for the recognition of impairment gains or losses, interest income and foreign exchange gains and losses which are recognised in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognised in OCI is reclassified from equity to profit or loss and recognised in other gains/(losses). Interest income from these financial assets is included in finance income using the effective interest rate method. Foreign exchange gains and losses are presented in other gains/(losses) and impairment expenses are presented as separate line item in the statement of profit or loss.

Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Company's right to receive payments is established.

2. Summary of significant accounting policies (continued)

g) financial liabilities

In both the current and prior period, financial liabilities are classified as subsequently measured at amortized cost.

Financial liabilities are derecognized when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

The exchange between the Company and its original lenders of debt instruments with substantially different terms, as well as substantial modifications of the terms of existing financial liabilities, are accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The terms are substantially different if the discounted present value of the cash flows under the new terms, including any fees paid net of any fees received and discounted using the original effective interest rate, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability. In addition, other qualitative factors, such as the currency that the instrument is denominated in, changes in the type of interest rate, new conversion features attached to the instrument and change in covenants are also taken into consideration. If an exchange of debt instruments or modification of terms is accounted for as an extinguishment, any costs or fees incurred are recognised as part of the gain or loss on the extinguishment. If the exchange or modification is not accounted for as an extinguishment, any costs or fees incurred adjust the carrying amount of the liability and are amortized over the remaining term of the modified liability.

h) Offsetting of financial instruments

Financial assets and liabilities are offset, and the net amount reported in the balance sheet when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously.

i) Equipment and vehicles

All categories of equipment and motor vehicles are initially recorded at cost and subsequently stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

& D

2. Summary of significant accounting policies (continued)

i) Equipment and vehicles (continued)

Depreciation on other assets is calculated using the straight-line method to write down their cost to their residual values over their estimated useful lives, as follows:

Equipment and motor vehicles 3 - 8 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each financial reporting date. An asset's carrying amount is written down immediately to its estimated recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposal of property and equipment are determined by reference to their carrying amount and are included in the income statement.

j) Intangible assets

The company's intangible assets relate to computer software. Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized over their estimated useful lives of three years.

Development costs that are directly associated with the production of identifiable and unique software products controlled by the company, and that will probably generate economic benefits exceeding costs beyond one year, are recognised as intangible assets if:

- It is technically feasible to complete the software product so that it will be available for use;
- Management intends to complete the software product and use or sell it;
- There is an ability to use or sell the software product;
- It can be demonstrated how the software product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and use or sell it are available; and,
- The expenditure attributable to the software product during its development can be reliably measured.

Direct costs include the software development, employee costs and an appropriate portion of relevant overheads. Other development expenditure that do not meet these criteria are recognised as an expense as incurred. Development costs that have been expensed are not recognised as an asset in a subsequent period.

Computer software development costs recognised as assets are amortised over their estimated useful lives (not exceeding three years). Costs associated with maintaining computer software program are recognised as an expense as incurred.

S. D

BK GENERAL INSURANCE COMPANY LIMITED NOTES TO THE FINANCIAL STATEMENTS (continued)

For the year ended 31 December 2020

2. Summary of significant accounting policies (continued)

k) Foreign currency translation

a) Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The financial statements are presented in Rwanda Francs which is the Company's functional currency and rounded to "000".

(b) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss account.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the profit or loss within 'finance income or cost. All other foreign exchange gains and losses are presented in the profit and loss account within 'other income.

I) Share capital

Ordinary shares are classified as 'share capital' in equity. Any premium received over and above the par value of the shares is classified as 'share premium' in equity.

m) Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the Statement of Financial Position.

n) Employee benefits

(i) Retirement benefit obligations

The Company's contributions to the defined contribution schemes are charged to the profit or loss account in the year to which they relate. Its employees also contribute to the appropriate national Social Security Fund, which are defined contribution schemes.

(ii) Other entitlements

Employee entitlements to long service awards are recognized when they accrue to employees. A provision is made for the estimated liability for such entitlements as a result of services rendered by employees up to the financial reporting date.

The estimated monetary liability for employees' accrued annual leave entitlement at the financial reporting date is recognized as an expense accrual.

2. Summary of significant accounting policies (continued)

o) Income tax expense

Income tax expense is the aggregate of the charge to the profit and loss account in respect of current income tax and deferred income tax. Current income tax is the amount of income tax payable on the taxable profit for the period determined in accordance with Rwanda tax laws.

Deferred income tax is provided in full, using the liability method, on all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. However, if the deferred income tax arises from the initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss, it is not accounted for. Deferred income tax is determined using tax rates and laws that have been enacted or substantively enacted at the reporting date and are expected to apply when the related deferred income tax liability is settled.

Deferred income tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilized. Deferred income tax is provided on temporary differences arising on investments in associates, except where the timing of the reversal of the temporary difference is controlled by the Company and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

p) Dividend distribution

Dividends payable to the Company's shareholders are charged to equity in the period in which they are declared. Proposed dividends are shown as a separate component of equity until declared.

q) Provisions

Provisions for legal claims are recognised when: the company has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount has been reliably estimated. Provisions are not recognised for future operating losses. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense. CERTIFIED TRUE COPY

2. Summary of significant accounting policies (continued)

r) The company's leasing activities and how these are accounted for

The company leases office space in two places in City of Kigali namely Remera branch and Headquarters. Rental contracts are typically made for fixed periods of 1 to 5 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

Contracts may contain both lease and non-lease components. The company allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the company is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- variable lease payment that are based on an index or a rate
- amounts expected to be payable by the lessee under residual value guarantees
- the exercise price of a purchase option if the lessee is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases in the company, the lessee's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic company environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received
- uses a build-up approach that starts with a risk-free interest rate adjusted for credit risk for leases held by BK General Insurance company Limited which does not have recent third party financing, and
- makes adjustments specific to the lease, eg. term, country, currency and security.

& P

2. Summary of significant accounting policies (continued)

r) The company's leasing activities and how these are accounted for (continued)

Right-of-use assets are measured at cost comprising the following:

- · the amount of the initial measurement of lease liability;
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs and
- restoration costs

Payments associated with short-term leases and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

Extension and termination options

Extension and termination options are included in a number of property leases across the company. These terms are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the company and not by the respective lessor.

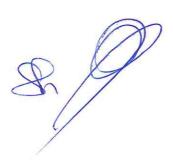

Critical judgements in determining the lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For the leases of office space, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the company is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the company is typically reasonably certain to extend (or not terminate).
- Otherwise, the company considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset. Most extension options in offices and vehicles leases have not been included in the lease liability, because the company could replace the assets without significant cost or business disruption.

The lease term is reassessed if an option is actually exercised (or not exercised) or the company becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

DATE PWC Rwanda Limited

2. Summary of significant accounting policies (continued)

r) The company's leasing activities and how these are accounted for (continued)

The current lease terms have been estimated to be 7 years periods, if these were to be extended by 10 years periods the right of use of asset and corresponding liability would increase by Rwf 245 million and Rwf 250 million respectively and depreciation and interest expense would increase by 27 million and Rwf 47 million respectively. New offices were rented at DP World and the right of use of assets amount increased by 43m.

3 Critical accounting judgements and key sources of estimation uncertainty

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities within the next financial year. Estimates and judgments are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The ultimate liability arising from claims made under insurance contracts

The estimation of the ultimate liability arising from claims made under insurance contracts is the Company's most critical accounting estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the Company will ultimately pay for such claims that we have considered under note 4 – Insurance risk.

Impairment losses on financial assets

The loss allowances for financial assets are based on assumptions about risk of default and expected loss rates. The group uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Income taxes

Judgement is required in determining the Company's provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Lease term

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

4 Management of insurance and financial risks

The Company's activities expose it to a variety of risks, including insurance risk, liquidity risk, credit risk, and the effects of changes in foreign currency exchange rates and interest rates. The company's overall risk management program focuses on the identification and management of risks and seeks to minimize potential adverse effects on its financial performance, by use of underwriting guidelines and capacity limits, reinsurance planning, credit policy governing the acceptance of clients, and defined criteria for the approval of intermediaries and reinsurers. This section summarizes the way the Company manages these risks.

a) Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable.

For a portfolio of insurance contracts where the theory of probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims and benefits are greater than estimated. Insurance events are random and the actual number and amount of claims and benefits will vary from year to year from the level established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller the relative variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each of these categories to achieve a sufficiently large population of risks to reduce the variability of the expected outcome. Factors that aggravate insurance risk include lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered.

The frequency and severity of claims can be affected by several factors. The most significant the increase in the number of cases coming to court that have been inactive or latent for a long period of time. Estimated inflation is also a significant factor due to the long period typically required to settle these cases. The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling.

The underwriting strategy attempts to ensure that the underwritten risks are well diversified in terms of type and amount of risk, industry and geography.

4 Management of insurance and financial risks (continued)

a) Insurance risk (continued)

The insurance risks exposure Increased primarily as a result of increase in Fire and Motor contracts in the current year.

Sources of uncertainty in the estimation of future claim payments

Claims on casualty contracts/general risks are payable on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, liability claims are settled over a long period of time, and a larger element of the claims provision relates to incurred but not reported claims (IBNR). There are several variables that affect the amount and timing of cash flows from these contracts. These mainly relate to the inherent risks of the business activities carried out by individual contract holders and the risk management procedures they adopted. The compensation paid on these contracts is the monetary awards granted for bodily injury suffered by employees (for employer's liability covers) or members of the public (for public liability covers). Such awards are lump-sum payments that are calculated as the present value of the lost earnings and rehabilitation expenses that the injured party will incur as a result of the accident.

The IBNR has been determined and kept to the statutory minimum requirement of 15% of the outstanding claims payment.

	Regulatory	Actuarially
		computed
	FRW' 000	FRW' 000
Gross IBNR	335,430	408,603
Net IBNR	210,930	299,612

4 Management of insurance and financial risks (continued)

b) Financial risk

The Company is exposed to financial risk through its financial assets, financial liabilities (investment contracts and borrowings), reinsurance assets and insurance liabilities. In particular, the key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance and investment contracts. The most important types of risk are credit risk, liquidity risk, market risk and other operational risks. Market risk includes currency risk, interest rate risk and equity price risk.

These risks arise from open positions in interest rates, currency exchange rates and equity securities prices, all of which are exposed to general and specific market movements. The risks that the company primarily faces due to the nature of its investments and liabilities are liquidity risk and interest rate risk.

The Company manages exposure to these risks through policies developed by the Finance and Investment Committee (FIC) at the group level. These policies have been developed to achieve long-term investment returns in excess of the company's obligations under insurance and investment contracts. The principal technique of the Company's FIC is to match assets to the liabilities arising from insurance and investment contracts by reference to the type of benefits payable to contract holders. For each distinct category of liabilities, a separate portfolio of assets is maintained.

i) Market risk

Foreign exchange risk

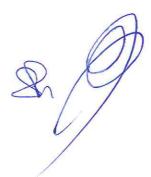

The company does not maintain foreign currency denominated current accounts with local banks. Which does not expose the company to foreign exchange risk arising from the various currency exposures, the company has had a few transactions denominated in foreign currency primarily with respect to the US dollar. Foreign exchange risk arises from future commercial transactions and recognized assets and liabilities and is managed primarily through setting limits on the maximum exposure to any one currency. This exposes the company to foreign exchange risk arising from the various currency exposures, primarily with respect to the US dollar.

As of December 31, 2020 the company did not recognize any gain or loss on foreign exchange gain because it trades mostly in Rwandan francs.

Cash flow and fair value interest rate risk

Fixed interest rate financial instruments expose the company to fair value interest rate risk. Variable interest rate financial instruments expose the company to cash flow interest rate risk.

The Company's fixed interest rate financial instruments are deposits with financial institutions. The Company had no variable interest rate financial instrument as of December 2020 hence they are not sensitive to interest rate. No limits are placed on the ratio of variable rate financial instruments to fixed rate financial instruments.

Management of insurance and financial risks (continued)

b) Financial risk (continued)

i) Market risk (continued)

Price risk

The Company has financial instruments in Treasury bonds are measured at amortized cost and commercial papers which are not subject to price risk.

ii) Credit risk

The Company has exposure to credit risk, which is the risk that a counterparty will be unable to pay amounts in full when due. Key areas where the Company is exposed to credit risk are receivables arising out of direct insurance arrangements, receivables arising out of reinsurance arrangements, reinsurers' share of insurance liabilities, loans, other receivables, deposits and cash at bank.

The Company structures the levels of credit risk it accepts by placing limits to counterparty, or groups of counterparties, and to industry segments. Such risks are subject to an annual or more frequent review. Limits on the level of credit risk are approved by the Board of Directors.

Reinsurance is used to manage insurance risk. This does not, however, discharge the company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is considered on an annual basis by reviewing their financial strength prior to finalization of any contract. The exposure to individual counterparties is also managed by other mechanisms, such as the right of offset where counterparties are both debtors and creditors of the Company. Management information reported to the company includes details of provisions for impairment on loans and receivables and subsequent write-offs. Management makes regular reviews to assess the degree of compliance with the Company procedures on credit.

Maximum exposure to credit risk

2020

4 Management of insurance and financial risks (continued)

- b) Financial risk (continued)
- ii) Credit risk (continued)

All receivables that are neither past due or impaired are within their approved credit limits, and no receivables have had their terms renegotiated. None of the Company's credit risk counterparties are rated and none of the company's assets are past due or impaired.

No collateral is held for any of the above assets. All receivables that are neither past due or impaired are within their approved credit limits, and no receivables have had their terms renegotiated. None of the Company's credit risk counterparties are rated.

None of the above assets are past due or impaired except for amounts in receivables arising out of direct insurance arrangements which are due on inception of insurance cover.

The Company applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for receivables arising out of direct insurance arrangements. The expected loss rates are based on the payment profiles of premiums over a period of 3 months before 31 December 2020 respectively and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

On that basis, the loss allowance as at 31 December 2020 was determined as follows for receivables arising out of direct insurance arrangements and reinsurance arrangements as follows;

31 December	2020	2019
Direct insurance arrangements		
Expected loss rate	5%	0.5%
Carrying amount (Frw'000)	960,152	346,856
Loss allowance	47,513	1,596

The closing loss allowances as at 31 December 2020 reconcile to the opening loss allowances as follows:

Opening loss allowance as at 1 January	Frw '000 1,596	Frw '000 70,554
Increase in ECR on premium receivable recognized in profit or loss during the year	45,917	30,346
Write off during the year		(99,304)
At 31 December	47,513	1,596

Tomound and and	Frw '000	Frw '000
Expected loss rate	0%	0%
Carrying amount (Frw'000)	1,831,542	1,458,860
Loss allowance	-	

Receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Company, and a failure to make contractual payments for a period of greater than 60 days past due.

Impairment losses are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

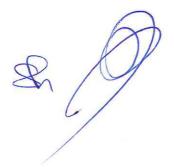

Receivables for which an impairment provision was recognized were written off against the provision when there was no expectation of recovering additional cash

All of the entity's debt investments at amortized cost are considered to have low credit risk, and the loss allowance recognized during the period was therefore limited to 6 months expected losses. Management consider 'low credit risk' for government bonds to be an investment grade credit rating with at least one major rating agency. Other instruments are considered to be low credit risk when they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term.

Deposits with financial institutions, cash at bank, government securities

Deposits with financial institutions, cash at bank and government securities are considered to have low credit risk, and the loss allowance recognised during the period was therefore limited to 12 months' expected losses. Management consider 'low credit risk' for these financial assets as they have a low risk of default and the issuer has a strong capacity to meet its contractual cash flow obligations in the near term. The loss rate assigned to these has been determined to be 0.17% for deposits with financial institutions and cash at bank which is the probability of default assigned to a B+ investment grade by Standard & Poors Rating Agency. The loss rate assigned to government securities has been determined to be 0.57% which is the probability of default assigned to a B+ sovereign grade by Standard & Poors Rating Agency.

The reconciliation of the loss allowance for deposits with financial institutions and government securities at amortised cost is disclosed under note 19 and note 20 respectively. The identified impairment loss on cash at bank and other assets was immaterial.

4 Management of insurance and financial risks (continued)

b) Financial risk (continued)

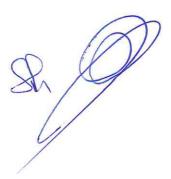

iii) Liquidity risk

Liquidity risk is the risk that the Company is unable to meet its payment obligations associated with its financial liabilities as they fall due and to replace funds when they are withdrawn.

The company is exposed to daily calls on its available cash resources for claims settlement and other administration expenses. The Company does not maintain cash resources to meet all of these needs as experience shows that a minimum level of reinvestment of maturing funds can be predicted with a high level of certainty. The Company manages liquidity risk by continuously reviewing forecasts and actual cash flows and maintaining banking facilities to cover any shortfalls.

The table below presents the cash flows payable by the Company under financial liabilities by remaining contractual maturities (other than insurance contract liabilities which are based on expected maturities) at the financial reporting date:

At 31 December 2020	Up to 1 month	1-3 months	3-12 months	1-5 years	Total

Capital management

The Company's objectives when managing capital, which is a broader concept than the 'equity' on the Statement of financial position are:

- to comply with the capital requirements as set out in the Insurance Regulations;
- to comply with regulatory solvency requirements as set out in the Insurance Regulations;
- to safeguard the Company's ability to continue as a going concern, so that it can continue to provide returns to shareholders and benefits for other stakeholders; and
- To provide an adequate return to shareholders by pricing insurance and investment contracts commensurately with the level of risk.

The Insurance Law (Law No. 05/2009 of 29/07/2009 on licensing and other requirements for carrying insurance business in Rwanda) requires separation of the life and non-life insurance businesses into separate companies and each of the companies to hold a minimum level of paid up capital of Frw 1 billion. However, the capital requirement will be Frw 3 Billion starting from January 2022

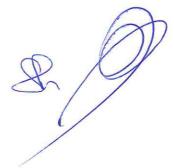

Non-life insurance businesses are required to maintain a solvency margin (admitted assets less admitted liabilities) equivalent to the higher of Frw 500 million or 20% of the net premium income during the preceding financial year.

The capital and regulatory solvency thresholds were effective from July 2011 and the company was therefore required to comply with them for the period ended 31 December 2020. During the year the Company held the minimum capital required to meet the solvency margins.

During the year end, the Company held the minimum capital required to meet the solvency margins. The Company's paid-up capital at the end of December 2020 is presented on note 25.

Fair value estimation

The valuation hierarchy, and types of instruments classified into each level within that hierarchy, is set out below:

	Level 1	Level 2	Level 3
Fair value determined using:	Unadjusted quoted prices in active market for identical assets and liabilities	Valuation model with directly or indirectly market observable inputs	Valuation models using significant non-market observable inputs
Types of financial assets:	Actively traded government and other agency securities	Corporate and other governments and loans	Highly structured OTC derivatives with unobservable parameters
Types of financial liabilities:	Listed equities	Unlisted equities	Highly structured OTC derivatives with unobservable parameters
	Listed derivative	Over-the-counter	
	instruments	derivatives	

Valuation methods and assumptions

Reinsurance assets, insurance receivables, other receivables, deferred acquisition cost, due from related parties, insurance contract liabilities, trade and other payables, due to related parties, approximate their carrying value amounts due to the short-term maturities of these instruments.

The following tables provide the fair value measurement hierarchy of the company's assets and liabilities. The tables below include items that have recurring fair value measurements (i.e. financial assets at FVOCI or FVPL). The fair value measurement also shows the fair value measurement of financial assets at amortised cost:

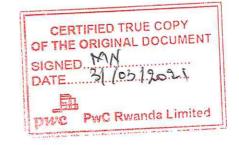

- 4 Management of insurance and financial risks (continued)
- b) Financial risk (continued)
- iii) Liquidity risk (continued)

22 Unearned premiums reserve

Unearned Premium Reserves (UPR) represents the liability for short term business contracts where the Company's obligations are not expired at the year end. Movements in the reserve are shown below:

	2020		
	Gross	Reinsurance	Net
	Frw'000	Frw'000	Frw'000
At start of year:	3,148,072	610,646	2,537,426
Increase/(decrease) in the year	835,755	169,300	666,455
	3,983,827	779,946	3,203,881

22 Unearned premiums reserve (continued)

		2019	
	Gross	Reinsurance	Net
	Frw'00	Frw'000	Frw'000
At start of year:	2,549,477	372,812	2,176,665
Increase/(decrease) in the year	598,594	237,834	360,760
	3,148,072	610,646	2,537,426

UPR was computed based on Regulation N°05/2009 of 29/07/2009 on licensing requirements and other requirements for carrying out insurance business in Rwanda using 365th method.

The Company uses the chain ladder techniques to estimate the ultimate cost of claims and the IBNR. Chain ladder techniques are used as they are an appropriate technique for mature classes of business that have a relatively stable development pattern. This involves the analysis of historical claims development factors and the selection of estimated development factors based on this historical pattern.

f) Factoring of Invoices with Bank of Kigali Plc

The company entered into a factoring with no recourse agreement with the Bank of Kigali PLC in order to solve the issue of long outstanding receivable especially from public institutions. The cost of factoring of the invoices is agreed at 5% flat fee applicable on any paid invoice. There were no factoring transactions during the year ended December 31, 2020. (2019: Frw 194 million).

32 Contingent liabilities

In common with the insurance industry, the company is subject to litigation arising in the normal course of insurance business. No provision has been made in these financial statements as all pending litigations at the year-end were related to claims outstanding which have been provided for
